Develop your proposal

Resources for your project

Many communities across Europe are already testing solutions to address the various challenges faced by our ocean, seas and waters. This document provides resources that may support you in developing your project proposal for BlueActionBANOS Open Calls.

You can use these resources to explore how other projects have approached the challenges and identify methods and tools that might be relevant to your local context. You are free to adapt solutions, combine approaches, or develop a unique idea of your own. The resources presented here are intended for you to find some inspiration.

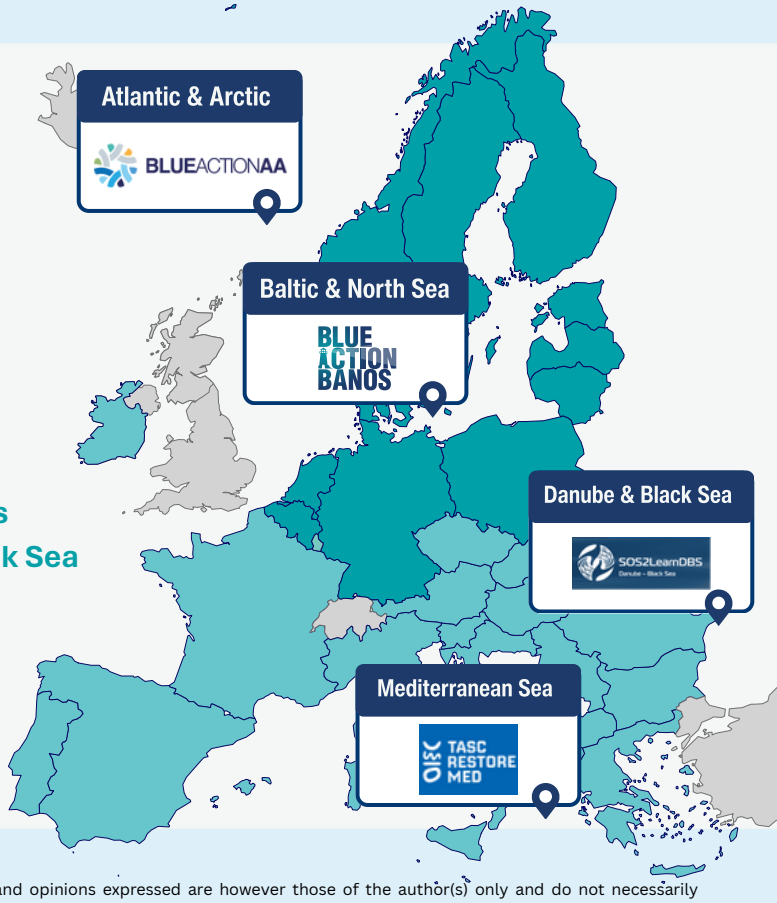
Find your regional hub

Regional hubs, or Lighthouses, support you when you want to take action as part of the EU Mission Ocean and Waters. They work in four regions and offer funding opportunities, expert guidance, and technical assistance to help you realise your project ideas.

Lighthouses are coordinated through:

- BlueActionBANOS in the Baltic and North Sea
- BlueActionAA in the Arctic and Atlantic basins
- SoS2LearnDBS for the Danube River and Black Sea
- TASC-RestoreMed for the Mediterranean Sea

Across all regions, Lighthouses enable communities to learn from and build on solutions developed across Europe.



Funded by the European Union

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Climate, Infrastructure and Environment Executive Agency (CINEA). Neither the European Union nor the granting authority can be held responsible for them.

Find existing solutions across Europe

Mission Solutions Library

A library of solutions, best practices, project outcomes and any other relevant material that can be replicated and scaled across Europe and beyond.

Why use it?

Explore how projects have addressed challenges related to the Mission Ocean and Waters, such as marine protection & restoration, pollution prevention & management, decarbonisation of blue economy, etc.

What can you find?

- technological solutions
- regulation and governance
- financing and business models
- knowledge-sharing and capacity-building
- tools and models
- sustainable goods and consumables

Find solutions in your region

WaveLinks

A web platform that maps the landscape of the Mission Ocean and Waters.

Why use it?

Search and filter the database to find existing initiatives and solutions across the European basins and gain inspiration for your own work .

What can you find?

- projects
- stakeholders
- solutions
- public engagement methods
- citizen science initiatives

BlueMissionMed Portfolio of Innovative Transformative Solutions

A database of products and methodologies addressing pollution of ocean and waters.

Explore how the Mediterranean has engaged with prevention, minimisation, elimination, and monitoring of pollution.

- technological solutions
- frameworks for citizen engagement, training, and education
- governance frameworks
- business models

EcoDaLLi Portal

A digital platform supporting sustainable restoration and innovation in the Danube basin.

Discover governance solutions for the protection and restoration of freshwater ecosystems and biodiversity.

- catalogue of nature-based solutions
- catalogue of business innovations
- Practices Living Labs System (PLLS) tool
